Engineering solutions for Your business. Together

RAP Group - Key figures

Constant growth

RAP Steel is part of RAP Group and is specialized in stainless steel equipment.

RAP Steel perfectly complements the services of the companies in the group, with a well-trained team ready to meet the most complex challenges.

Completed projects

Stainless steel equipment for the most complex requirements

RAP Steel manufactures highly customizable stainless steel equipment for industries such as food, chemical, or pharma. From design to production, we are fully involved in every stage of a project, always striving to exceed expectations.

Technological equipment, from design to execution

RAP Steel products carry the RAP Group quality guarantee.

Production of technological process equipment:

- Tanks
- Silos
- Melting units
- Process Ducts
- Skids
- Stainless steel platforms

Services:

- Design and engineering
- Production according to the client's project
- Pre-assembly

Why **RAP Steel**?

Continuous development

We work with complex systems every day and know how important it is that every component works. We continuously invest in the development of technological capabilities and professional skills.

Customised services

Each project is unique. We understand our customers' needs and adapt to their requirements so that we deliver the required products to the specific standards.

Results-driven

We are always looking for ways to optimise the way we work, to increase efficiency and constantly simplify the process.

Solid commitment

We deliver what we promise: on time, within budget, meeting all requirements.

Innovative mindset

We have a team that is passionate about engineering and responds enthusiastically to any challenge.

What drives us

Strong partnership

Whether we are talking about clients, collaborators or colleagues, we build strong relationships based on trust where transparent communication and serious commitment play the most important roles.

Continuous development

We are explorers and eager to innovate, constantly trying to find the most effective approach to meet a challenge.

Technological excellence

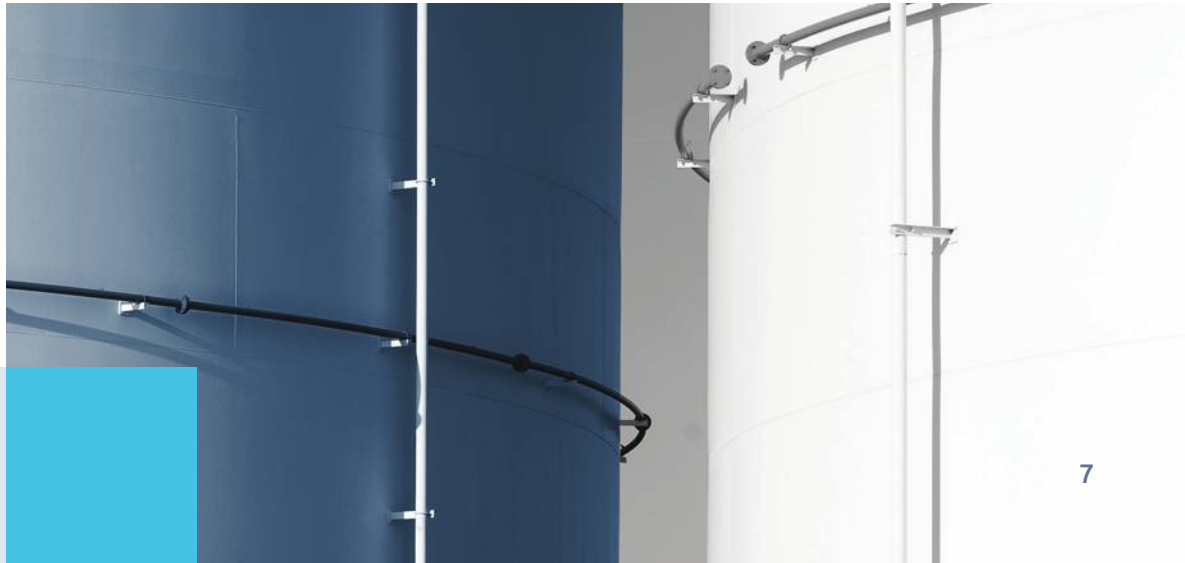

In each field of activity we have built teams of professionals who are truly passionate about their work, up-to-date with the latest in the industries we work with and with a keen eye for detail.

When innovation and technology team up

Growth and development is a priority for RAP Steel, both from a human and technological point of view.

Our experience with international companies has taught us to always remain open to new things and to be ready for any challenge.

We constantly invest in modern technologies to increase the efficiency and quality of our products.

Services

Technological stainless steel equipment, from design to execution

Design and engineering of custom equipment according to customer needs:

- P&IDs and 3D isometrics
- 3D mechanical drawings and stainless steel equipment design
- Electro-pneumatic schemes

Execution of equipment according to the client's project:

- P&IDs and 3D isometrics
- 3D mechanical drawings and stainless steel equipment design
- Electro-pneumatic schemes

Equipment Pre-assembly

- Equipment or manufacturing lines pre-assembled on stainless steel supports to reduce on-site assembly time
- Skids, platforms

Products

RAP Steel manufactures stainless steel technology equipment such as tanks, vessels, silos, skids, process tubing, platforms, melting equipment and other equipment of various capacities depending on customer requirements for industries such as food, chemical or pharmaceutical.

Tanks

RAP Steel produces tanks of different capacities, depending on customer requirements.

Silos

Indoor and outdoor storage of granulated or powdered solid materials: sugar, flour, seeds and cereals, salt, pellets.

more about our projects!

Melting systems

For raw materials or finished products: chocolate, cocoa butter, cocoa liquor, icing products, other solidifying fats.

Skids

For mounting and assembling process equipment on skids (modules) for use in the food, chemical or pharmaceutical industry.

Process Ducts

Process duct's conveys large volumes of hot, dusty air from processing equipment to mills, baghouses to other process equipment.

Stainless steel platforms

We produce platforms and metal structures for specific technological equipment used in the food, chemical or pharmaceutical industries.

Melting units

Suitable for raw materials or finished goods: chocolate, cocoa butter, cocoa liquor, glazing products, other solidifying fats.

Features

- Stainless steel (AISI 304, 316L)
- Cleaning-In-Place (CIP) ready
- Heating system
- Insulation and cladding
- Static (hot grid) or stirred (agitator)
- Horizontal or vertical
- Cylindrical or rectangular

Location: Romania

Industry: Food

Duration: 1-3 months
